

Giorgio Caizzi

giocaizzi@gmail.com | Milan, Italy

 giorgio-caizzi  giocaizzi

AI Engineer who embeds with enterprise clients to ship production AI end-to-end, from stakeholder requirements to RAG and agent systems in production. Self-taught into code as an environmental engineer, now delivering GenAI for banks, retail and the public sector.

EXPERIENCE

Associate Manager, Products (prev. Senior Consultant)

May 2024 - Present

Jakala S.p.A.

Milan, Italy

- **Forward Deployed Engineer** on a Banca Generali engagement, now in its second year, scoped to the AI transformation of the whole bank: embedded with the client, taking requirements and presenting outcomes directly to C-level sponsors and non-technical business owners, delivering on their Microsoft stack (Azure, Copilot) as their Microsoft partner. The custom core is a production RAG over 600k pages of internal banking regulation (PDF, Word, Excel): structure-aware chunking, hierarchical retrieval and an event-driven sync pipeline into the bank's platforms, quality-gated by a golden evaluation set. In production, rolling out across 2k employees.
- Built a GraphQL wrapper over a SQL database with role-based access control, letting AI agents run SQL and geospatial queries scoped to each user's role. Non-technical users chat with their data beside a live map; productized for clients including Regione Lombardia and NielsenIQ.
- Led the engineering team that built an AI pipeline generating on-model product photography for Benetton (ComfyUI with Flux and off-the-shelf LoRAs on Azure GPUs) at up to 90 SKUs/day with a human in the loop, replacing studio photoshoots for most of the brand's ecommerce imagery by autumn 2025.
- Developed the vision-language pipeline that estimates a meal's carbohydrates from a single photo for T.Conto (a consumer nutrition app live on the App Store and Google Play), using agents to retrieve ingredient reference values from a vector store of the official food-composition tables.

Environmental Engineer

Feb. 2021 - May 2024

AECOM URS Italia S.p.A.

Milan, Italy

Remediation of contaminated industrial sites for ENI, Q8 and the US DoD.

- Built Python pipelines (geopandas, GDAL, rasterio, PostGIS) that turned days of manual GIS work into hours, open-sourced on GitHub as [py3dinterpolations](#).

Brand Activation & Live Events

Nov. 2013 - Feb. 2021

Red Bull, GoPro EMEA

Italy & Europe

Seven years of live brand-activation for Red Bull and GoPro at major European sporting events, alongside my studies: trilingual public speaking and running games for crowds.

EDUCATION

MSc (102/110) and BSc (97/110) in Environmental & Land Planning Engineering

Milan, Italy

Politecnico di Milano

Sep. 2014 - Dec. 2020

Relevant coursework: computer science (30/30), GIS & spatial data, statistical models & stochastic processes, remote sensing

Theses: PM2.5 spatial-interpolation algorithm (Wiseair S.r.l.); facility-location optimization for Milan's public water network (MM S.p.A.)

The British School of Brussels

Brussels, Belgium

International Baccalaureate Diploma (36/45)

Sep. 2012 - May 2014

TECHNICAL SKILLS

Backend & Systems: Python & TypeScript, FastAPI, REST & GraphQL, event-driven pipelines & queues, OpenTelemetry distributed tracing, Docker, CI/CD

Data: SQL & NoSQL, Redis, vector & graph stores

Cloud & Infrastructure: Azure, GCP, Terraform (IaC), networking, serverless

GenAI: RAG & retrieval, multimodal, agents & MCP, evaluation-driven development

PROJECTS

 **ralph-copilot** autonomous agent loop for GitHub Copilot ★138

 **greenhouse** smart-irrigation app exposing an MCP server to LLM agents

 **btc-cycles** bitcoin-cycle analytics with a live daily dashboard

Copilot custom agents, git-as-memory

Python, FastAPI, MCP, Docker

Python, PyPI, CI/CD, plotly

PERSONAL SKILLS

Languages: Italian (native), English (bilingual), French (professional working proficiency).

Interests: Surfing, skiing and road-cycling, chased worldwide: Indonesia, Angola, South Africa, across Europe.
